## Leaders in production of vine plants

# Viveros Villanueva

*vides*

Health guarantee certified by the EC

The gained experience and passionate work of four generations of the Villanueva family has made us leaders in production and commercialization of vine plants. The incorporation of the best production, health and quality control techniques has converted us in a modern nursery with vocation and international presence.

### Our Plants...

- ... Ready for mechanic plantation.
- ... Homogeneous root system to favor a fast development in the terrain.
- ... Strong and consolidated union between the leaf bud and the rootstock.
- ... Paraffined to protect them from the meteorological inclemency.
- ... Perfectly prepared for its transport and conservation.

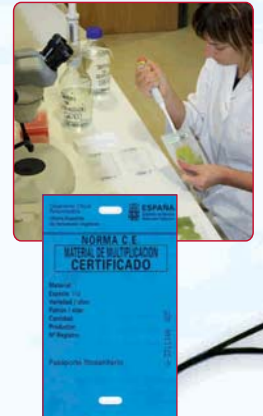

## Wide range of vine varieties

We have a wide catalogue of both international and native varieties grafted in the best available rootstocks in the world. The cloned selection of grapes that we offer you brings together the quality of the fruit and a good production. We inform you that we graft upon request vegetable materials selected by our customers.

Please consult us about availability and confirm your reserve.

Our plants are subjected to numerous and rigorous health controls through which we obtain the highest certification available at the moment. These analysis are done by official organizations and by technicians from our nursery. Thereby offering customers greater calmness in the health field.

- ... EVENA, depending on the Ministry of Agriculture, is the official organization that makes the health controls and provides us with the phytosanitary passport.
- ... In our own lab we execute supplementary controls (over nematodes in soils and virus diseases in plants) in order to guarantee our customers that our plants present contrasted health security.

## Technical advice and management of new plantations

- ... Diagnosis of the soil analysis.
- ... Wine-growing technical consultancy.
- ... Selection of the most suitable rootstock, according to soil, climate and variety.
- ... Plantations design.
- ... Wine-growing accessories.
- ..... Request a budget for **TURN-KEY PROJECTS**
